

SPIROL's Application Engineers stand ready to help you with your threaded joint, whether it be the application of an Insert or a Compression Limiter, to ensure continued integrity of the bolted connection. When reviewing your design requirements, our Application Engineers will help you select the most appropriate component to achieve your performance and cost objectives. As it's beneficial to you, our first option will be to recommend the use of a standard Insert or Compression Limiter, but if these do not meet the application's requirements, we will design and produce a custom component which will.

Examples of special offerings:

- **Threaded studs**
- **Special knurl configurations and external features for unique installation and performance requirements**
- **Special materials:**
 - 300 Series Austenitic Stainless Steel
 - 12L14 Steel
- **Special plating requirements:**
 - Nickel Plate
 - Zinc Plate
 - Black Zinc Plate
- **Cross-drilled holes**
- **Special internal threads and hole dimensions**
- **Tighter than standard tolerances**
- **Unique diameter and length combinations**
- **Special designs for non-traditional plastics**

Engage us early on your next design!
