Bollhoff NEO B107 & B109 (aka Rivet Nut USA™ B4107 & B4109) Battery Rivet Nut Tools

Battery & Warranty Information

Battery Information

Average 1,000 cycles per 2AH battery charge for a typical steel M6 rivet nut.
Purchase authorized batteries from Rivet Nut USA™.

Warranty Advisory / Battery & Charger Requirement

Due to the high dollar value of this tool and its sensitive internal components, it is essential to only use **genuine Makita batteries** with your tool.

We strongly recommend purchasing your Makita batteries from **Rivet Nut USA™** (a division of **Cardinal Components, Inc.**). We guarantee 100% genuine Makita products, each serial-numbered for full traceability.

Using third-party or non-Makita batteries can lead to power irregularities that will damage the internals of the tool, lead to higher repair costs, and **will void the warranty** (confirmed through diagnostic error coding).

Thank you for choosing the best battery-operated tool on the market, and for investing in the right steps to keep it performing at its best.
