Introducing the EcoSet™ cordless riveting tool, ergonomically designed to elevate your riveting experience. This contractor grade tool is made with efficiency and portability in mind. From standard blind rivets to structural, EcoSet is ready to handle any rivet in its capacity and perform in your environment. EcoSet offers pneumatic-like performance without the hassle and noise of a compressor and airline, enabling freedom and flexibility in your application workspace. Its durable construction guarantees low maintenance, allowing you to focus on the task at hand, without worrying about frequent repairs. With EcoSet, you can enjoy the convenience of an extended battery life and run time, providing sustained power for prolonged usage. Upgrade your riveting tasks with this cordless tool that combines speed, durability, longevity, and reliability, in one affordable package.
